

„C++ / GUI “

Exercise 18

1 References

Use your the program of the template exercise in order to test your functions.

1. Reimplement the `swap` function of the last exercise using reference parameters.
2. Can you reimplement your `sort` function?
3. Implement a function `rMin(vector< T >)` that returns a reference to the minimum value of a vector.

2 cout

cout is the printf of C++.

1. Change the LC-circuit to use cout.
2. What is the difference when printing doubles?

Have fun!
